Tognum America to display new MTU power and service solutions for the oil and gas industry at 2012 Offshore Technology Conference

MTU features engines for both offshore and onshore oil and gas applications including fracturing units, mechanical drives for pumps, cranes and drilling, and generator drive engines for auxiliary and emergency power.

HOUSTON – [Tognum America Inc.](http://www.tognum.com), a specialist for propulsion and power solutions, will showcase several new MTU technologies at the [2012 Offshore Technology Conference \(OTC\)](http://www.otc-online.com), April 30 through May 3 at the Reliant Center. The MTU products Tognum will display are designed to power equipment used in the exploration and production of oil and natural gas. MTU products are developed for on- and off-shore applications, including electric drives for stationary and mobile power generation and mechanical drive engines used in pressure pumping (fracking), well service support and emergency fire water pumps.

- more -

MTU's portfolio of products on display at Tognum America's exhibit in Booth #3374 will include:

- A preview of the new **Auxiliary Generator Package powered by the MTU 8V 1600 engine**, designed to provide electrical power to drill rig operations.
- An advanced view of MTU's **Backpack** product, which is an optional, pre-engineered air filtration/cleaner and exhaust mounting system that provides OEMs with greater ease of installation. The Backpack will be displayed together with an **EPA Tier 4 Interim certified MTU Series 4000 T94 frac engine**. The EPA certified 57.2 L engine requires no exhaust aftertreatment and offers two power ratings for hydraulic fracturing applications: 1678 kW (2250 bhp) and 1865 kW (2500 bhp).
- The 12.8 L, in-line 6-cylinder, MTU **Series 1300 engine, which will be released in 2014**, incorporating a new, smaller-sized **Selective Catalyst Reduction (SCR) system** that is designed to make installation easier for OEMs in Tier 4 Final installations. The Series 1300 will be offered for EPA Tier 4 Final applications, and is designed for a wide range of mobile and stationary well servicing applications, offering powers ratings from 340 kW to 380 kW (456 bhp to 509 bhp).
- The **MTU 12V 4000 P83 engine**, the off-shore industry benchmark for emergency backup power and fire pump systems.

OTC attendees are also invited to visit the MTU **ValueCare** exhibit, located in Booth # 3375, which will offer information on the new MTU **ValueCare** portfolio of genuine parts, expert service and remanufactured engines.

About Tognum America

Tognum America (formerly MTU Detroit Diesel) is a Tognum Group company and is responsible for the manufacture, sales and support of MTU and MTU Onsite Energy branded products in North and Latin America.

With its two business units, Engines and Onsite Energy, the Tognum Group is one of the world's leading suppliers of engines and propulsion systems for off-highway applications and of distributed power generation systems. These products are based on diesel engines with up to 9,100 kilowatts (kW) power output, gas engines up to 2,150 kW and gas turbines up to 45,000 kW.

The product portfolio of the Engines business unit comprises MTU engines and propulsion systems for ships, for heavy land, rail and defense vehicles and for the oil and gas industry. The Onsite Energy business unit supplies distributed power generation systems carrying the MTU Onsite Energy brand. These comprise diesel engines for emergency power, prime power and continuous power, as well as cogeneration power plants based on gas engines and gas turbines that generate both power and heat. Tognum's product portfolio also features fuel-injection systems built by L'Orange.

In 2011, Tognum generated revenue of around €2.97 billion and employs approximately 10,000 people. Tognum has a global manufacturing, distribution and service structure with 22 fully consolidated companies, more than 140 sales partners and over 500 authorized dealerships at approximately 1,200 locations. Since September 2011, Engine Holding GmbH, a joint venture between Daimler AG and Rolls-Royce Group plc, has a majority holding in Tognum.
