## **MTU to showcase advanced Series 2000 engine for new workboats at Commercial Marine Expo**

*The state-of-the-art Series 2000 high-speed marine diesel engine features fast throttle response, low emissions and high fuel efficiency in a compact package.*

NORFOLK, Virginia – The Tognum brand [MTU](#) will be showcasing the Series 2000 marine engine for new workboat installations at the Commercial Marine Expo, June 22-23, 2011 in booth #201. Available in both 12V and 16V configurations, with power output that ranges from 805 bhp to 1,070 bhp (600 - 800 kW) at 1,800 RPM, the Series 2000 is one of the most advanced high-speed marine diesel engines in the industry. In addition to the Series 2000, MTU will also be displaying the venerable Series 60 engine which continues to play a key role in powering workboats worldwide.

A TOGNUM GROUP BRAND

“The MTU Series 2000 marine engine has been popular for repowering older vessels, but it is especially suited to new workboat installations by virtue of its high fuel efficiency, low emissions, fast throttle response and low noise and vibration,” says Joerg Fischer-Felsberg, senior manager of marine sales, MTU. “As a state-of-the-art high-speed marine diesel, the Series 2000 is also compact for its power output, freeing up valuable space in engine rooms for more efficient cooling and maintenance access.”

With more than 650,000 units in operation around the globe, the MTU Series 60 engines have demonstrated both high reliability and durability. Power output ranges from 350 bhp to 825 bhp (261 kW to 615 kW) at 1,800 to 2,300 RPM. The 6-cylinder inline MTU Series 60 features low fuel consumption, compact design, and ease of maintenance, making it one of the most economical engines in its class.

Also on display will be a variety of parts for the legacy Detroit Diesel 2-Cycle marine engines, including oil, filters and accessories. Over 3.5 million [Detroit Diesel 2-Cycle](#) engines have been built since 1940 and, as a testament to their longevity, nearly 300,000 of them are still in operation around the world. MTU has made a long-term commitment to maintaining a strong Detroit Diesel 2-Cycle engine support program and continues to offer service at more than 1,100 outlets worldwide.

**About MTU**

Under the brand “MTU” the Tognum Group markets engines and propulsion systems for applications in the marine, rail, power generation, oil and gas, agriculture, mining, construction and industrial, and defense markets. [www.mtu-online.com](http://www.mtu-online.com)

**About Tognum**

With its two business units, Engines and Onsite Energy & Components, the Tognum Group is one of the world's leading suppliers of engines and propulsion systems for off-highway applications and of distributed energy systems. These products are based on diesel engines with up to 9,100 kilowatts (kW) power output, gas engines up to 2,150 kW and gas turbines up to 45,000 kW.

The product portfolio of the Engines business unit comprises MTU engines and propulsion systems for ships, for heavy land, rail and defense vehicles and for the oil and gas industry. The portfolio of the Onsite Energy & Components business unit includes distributed energy systems of the brand MTU Onsite Energy and fuel-injection systems from L'Orange. The energy systems comprise diesel engines for emergency standby power, prime power and continuous power, as well as cogeneration power plants based on gas engines and gas turbines that generate both power and heat.

In 2010, Tognum generated revenue of around €2.56 billion and employs more than 9,000 people. Tognum has a global manufacturing, distribution and service structure with 25 fully consolidated companies, more than 140 sales partners and over 500 authorized dealerships at approximately 1,200 locations. Tognum America, located in Detroit/USA, and Tognum Asia, located in Singapore, are regional headquarters of the Tognum Group. The shares of Tognum AG (ISIN: DE000A0N4P43) have been stock-exchange listed since 2007 and are included in the MDAX. [www.tognum.com](http://www.tognum.com)
