MTU Onsite Energy to feature new 600 kW Series 1600 diesel generator set at Power Gen International

The MTU Onsite Energy booth at Power Gen International in Las Vegas, December 8–10, will focus on power nodes of 600 kW and less in both diesel and gas generator sets.

Mankato, Minnesota – Generator sets of 600 kW and less will be the focus of the [MTU Onsite Energy](#) booth (#C3-834) at the 2009 Power Gen International trade show at the Las Vegas Convention Center, December 8–10. The display will feature the newest generator set powered by an MTU engine, the 600 kW Series 1600. This family of smaller generator sets ranges in power output from 270 kW to 635 kW and offers engine configurations that include a 6-cylinder inline, 8V, 10V and 12V.

MTU Onsite Energy will also feature a 60 kW diesel generator set and a 40 kW gaseous generator set. All of the units scheduled for display at the show are well suited for use in small to medium emergency standby power and peak-shaving applications. They are also ideal for providing temporary power at construction sites and for supplying replacement power during facility maintenance or expansion.

“The new Series 1600 engine family covers more generator set power nodes than were previously available with MTU engines,” says Neil Majeski, program manager for the Series 1600 generator sets. “The addition of the Series 1600 engine now enables MTU Onsite Energy to supply generator set packages with MTU engines that range in power from 270 kW to 3,250 kW.”

A feature that should be of particular interest to Power Gen International attendees is the new streamlined outlet box on the Series 1600 generator sets that includes the breaker and control panels in one package. The flexible design allows mounting of the control panels and breakers on either the right or left side of the box, greatly facilitating installation. According to Majeski, this is now a standard design feature that previously would have required custom engineering.

For more information about the new MTU Series 1600 generator sets and other smaller power systems, please stop by the MTU Onsite Power booth #C3-834 during the 2009 Power Gen International show.

MTU Onsite Energy Corporation

MTU Onsite Energy Corp. (formerly Katolight Corporation) is a leading producer of diesel-powered generator sets from 30 to 3,250 kW and natural gas-powered generator sets from 20 to 400 kW for standby, prime power and cogeneration applications. The company also provides automatic transfer switches, paralleling switchgear, controls and accessories for complete power system solutions. Based in Mankato, Minnesota, MTU Onsite Energy Corp. combines the expertise of Katolight and MTU Detroit Diesel Power Generation under one brand to meet the ever-increasing distributed power needs of customers in North America and around the world. MTU Onsite Energy Corp. is part of the Tognum Group's business unit, Onsite Energy and Components. For more information, visit www.mtu-online.com

About Tognum

With its two business units, Engines and Onsite Energy & Components, the Tognum Group is one of the world's leading suppliers of engines, propulsion systems and distributed energy systems. These products are based on diesel engines with up to 9,100 kilowatts (kW) power output, gas engines up to 2,150 kW, fuel cells up to 360 kW and gas turbines up to 45,000 kW.

The product portfolio of the Engines business unit comprises MTU engines and propulsion systems for ships, for heavy land, rail and defense vehicles and for the oil and gas industry. The portfolio of the Onsite Energy & Components business unit includes distributed energy systems of the brand MTU Onsite Energy and fuel-injection systems from L'Orange. The energy systems comprise diesel engines for emergency standby power, prime power and continuous power, as well as cogeneration power plants based on gas engines, fuel cells and gas turbines that generate both power and heat.

In 2008, Tognum generated revenue of more than €3.1 billion and employs more than 8,900 people. Tognum has a global distribution and service structure with 24 fully consolidated subsidiaries, more than 140 sales partners and over 500 authorized dealerships at approximately 1,200 locations. The shares of Tognum AG (ISIN: DE000A0N4P43) have been stock-exchange listed since 2007 and are included in the MDAX.
