YouTube video shows 3,250 kW generator set from MTU Onsite Energy in earthquake simulation test

Weighing in at over 60,000 pounds, MTU Onsite Energy's 3,250 kW generator set is the largest unit ever to undergo successful shake-table testing for International Building Code (IBC) seismic certification.

MANKATO, Minnesota – A new video is available on [YouTube](#) that shows a 60,000-pound generator set undergoing shake-table testing for International Building Code (IBC) seismic certification. The 3,250 kW generator set from MTU Onsite Energy is the largest generator set to ever be shake-table tested. The certifying test, which subjects a generator set to random seismic accelerations in three axes to simulate an earthquake, was performed by VMC Group of Bloomingdale, NJ. The [MTU Onsite Energy](#) 3,250 kW generator set operated normally after the completion of the seismic test. The generator set also won pre-approval by the Office of Statewide Health Planning and Development (OSHPD) for use in California healthcare facilities. MTU Onsite Energy has IBC-certified products from 30 kW to 3,250 kW.

MTU Onsite Energy Corporation

MTU Onsite Energy Corp. (formerly Katolight Corporation) is a leading producer of diesel-powered generator sets from 30 to 3,250 kW and natural gas-powered generator sets from 20 to 400 kW for standby, prime power and cogeneration applications. The company also provides automatic transfer switches, paralleling switchgear, controls and accessories for complete power system solutions. Based in Mankato, Minnesota, MTU Onsite Energy Corp. combines the expertise of Katolight and MTU Detroit Diesel Power Generation under one brand to meet the ever-increasing distributed power needs of customers in North America and around the world. MTU Onsite Energy Corp. is part of the Tognum Group's business unit, Onsite Energy and Components. For more information, visit www.mtu-online.com.

Tognum

With its two business units, Engines and Onsite Energy & Components, the Tognum Group is one of the world's leading suppliers of engines and propulsion systems for off-highway applications and of distributed energy systems. These products are based on diesel engines with up to 9,100 kilowatts (kW) power output, gas engines up to 2,150 kW and gas turbines up to 45,000 kW.

The product portfolio of the Engines business unit comprises MTU engines and propulsion systems for ships, for heavy land, rail and defense vehicles and for the oil and gas industry. The portfolio of the Onsite Energy & Components business unit includes distributed energy systems of the brand MTU Onsite Energy and fuel-injection systems from L'Orange. The energy systems comprise diesel engines for emergency standby power, prime power and continuous power, as well as cogeneration power plants based on gas engines and gas turbines that generate both power and heat.

In 2009, Tognum generated revenue of €2.5 billion and employed more than 8,700 people. Tognum has a global manufacturing, distribution and service structure with 27 fully consolidated companies, more than 140 sales partners and over 500 authorized dealerships at approximately 1,200 locations. The shares of Tognum AG (ISIN: DE000A0N4P43) have been stock-exchange listed since 2007 and are included in the MDAX.
