Diesel Generator Set

16V2000 DS1050

Water charge-air cooling/910kVA/50 Hz/
prime power (fuel consumption optimized)/380 - 415V

Optional equipment shown. Standard equipment and colors (base frame, generator: grey, engine: blue) may vary.

Product highlights

Benefits
— Low installation costs
— Best fuel consumption values
— Long maintenance intervals
— Best-in-class reliability and availability
— Lifting vertically or with diagonal pull
— Compact design

1 Power available up to 40°C/400 m
Certifications and standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 9001:2008 and ISO 14001:2004
- Performance Assurance Certification (PAC)
  - Engine-generator set tested according to ISO 8528-5 for transient response
  - Verified product design, quality and performance integrity
  - All engine systems are prototype and factory tested
- Power rating
  - Permissible average power output during 24 hours of operation up to 75%

Standard equipment

Engine
- Air filters
- Oil pump for draining
- Full flow oil filters
- Closed crankcase ventilation
- Jacket water pump
- Thermostats
- Exhaust manifold – dry
- Belt driven radiator fan
- Electric starting motor – 24V
- Governor – electronic isochronous
- Base – formed steel
- SAE flywheel & bell housing
- Charging alternator
- Flexible fuel connectors
- Flexible exhaust connection

Generator
- NEMA MGI, IEEE and ANSI standards compliance for temperature rise and motor
- VDE 0530, IEC 60034-1, BS4999, BS5000, CSA22.2-100, AS 1364
- Sustained short circuit current of up to 250% of the rated current for up to 10 seconds
- Self-ventilated and drip-proof IP23
- Superior voltage waveform
- Digital, volts-per-hertz regulator
- No load to full load regulation
- Brushless alternator with brushless pilot exciter
- 4 Pole, rotating field
- 125 °C maximum prime temperature rise
- Heavy duty shielded ball bearings with a minimum B-10 life of 40,000 hrs
- Flexible coupling
- Full amortisseur windings
- 3-phase voltage sensing
- ±0.25% voltage regulation
- 100% of rated load – one step according to NFPA 110
- 3% maximum harmonic content

Standard features

- The engine-generator set complies to G3
- Engine generator set tested according to ISO 8528-5 for transient response
- Accepts rated load in one step as per NFPA 110
- All engine-generator sets are type and factory tested
- Global product support
- 16V2000 diesel engine (31,84 liter (1943 cu inch) displacement; 4-stroke)
- Engine-generator resiliently mounted
- Complete range of accessories
- Brushless, rotating field generator (PMG excitation; 250% short circuit capability; 2/3 pitch stator windings)
- Complete system metering
- LCD display

---

1 Represents standard product only. Consult your local MTU distributor for additional configurations.
Application data

Engine
Manufacturer MTU
Model 16V2000G65TB
Type 4-stroke
Arrangement 16V
Displacement/cylinder: l (cu inch) 1.99 (121)
Bore: mm (inch) 130 (5.1)
Stroke: mm (inch) 150 (5.9)
Compression ratio 16:1
Rated speed: rpm 1500
Engine governor electronic isochronous
Max power: kWm (bhp) 810 (1086)
Speed regulation ±0.25%

Lube oil capacity
Total oil system: l (gal) 102 (27)

Electrical
Electric Volts DC 24
Cold cranking amps under -17.8°C (0°F) 1000

Fuel system
Fuel supply connection size M22 x 1.5 - 60°/male
Fuel return connection size M12 x 1.5 - 60°/male
Maximum fuel lift: m (ft) 5 (16)
Recommended fuel see MTU fluids & lubrication spec.
Total fuel flow: l/hr (gal/hr) 600 (159)

Fuel consumption

\[
\begin{array}{|c|c|c|c|}
\hline
& \text{gal/hr} & \text{l/hr} & \text{g/kwh} \\
\hline
\text{At 100% of power rating:} & 51 & 193 & 198 \\
\text{At 75% of power rating:} & 38 & 145 & 198 \\
\text{At 50% of power rating:} & 26 & 99 & 203 \\
\hline
\end{array}
\]

Cooling/radiator system
Water pump capacity: l/min (gpm) 667 (176)
Heat rejection to coolant: kW (BTUM) 355 (20,188)
Heat rejection to after cooler: kW (BTUM) 170 (9,668)
Heat radiated to ambient: kW (BTUM) 45 (2559)
Engine coolant capacity: l (gal) 130 (34)

Air requirements
Aspirating: m³/min (SCFM) 60 (2117)

Exhaust system
Gas temp. (stack): °C (°F) 520 (968)
Gas volume flow temp: m³/min (SCFM) 162 (5720)
Maximum allowable back pressure: kPA 8.5

1 Values in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml.
2 Air density = 1.184 kg/m³ (0.0739 lbm/ft³)
Weights and dimensions

Drawing above for illustration purposes only, based on standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

Sound data

Consult your local MTU distributor for sound data.

Emissions data

Consult your local MTU distributor for emissions data.

Rating definitions and conditions

Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789.

Average load factor: ≤ 75%.

Consult your local MTU distributor for derating information.
