Diesel Generator Set

**MTU 18V2000 DS1400**

380V - 415V/50 Hz/prime/fuel consumption optimized

18V2000G26F/air charge air cooling

**Product highlights**

**Benefits**
- Low fuel consumption
- Optimized system integration ability
- High reliability and availability of power
- Long maintenance intervals
- Optimized ratio between size and power
- Wide operating range without derating

**Support**
- Global product support offered

**Standards**
- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to G3 according to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

**Power rating**
- System rating: 1250 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

**Performance assurance certification (PAC)**
- Engine-generator set tested to ISO 8528-5 for transient response
- 75% load factor for prime power applications
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

**Complete range of accessories available**
- Control panel
- Power panel
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical radiator
- Oversized voltage alternators

**Emissions**
- Fuel consumption optimized
- TA-Luft, Tier 2 compliant and NEA (ORDE) optimization optionally available

**Certifications**
- CE certification option
- VDE4110 Certification

#### Fuel system
- Maximum fuel lift: m
- Total fuel flow: l/min
- Fuel consumption 3)
  - At 100% of power rating: l/hr g/kWh
  - At 75% of power rating: l/hr g/kWh
  - At 50% of power rating: l/hr g/kWh

#### Lube oil system
- Total oil system capacity: l
- Max. lube oil temp. (alarm): °C
- Max. lube oil temp. (shutdown): °C
- Min. lube oil pressure (alarm): bar
- Min. lube oil pressure (shutdown): bar

#### Combustion air requirements
- Combustion air volume: m³/s
- Max. air intake restriction: mbar

#### Cooling/radiator system
- Coolant flow rate (HT circuit): m³/hr
- Heat rejection to coolant: kW
- Heat radiated to charge air cooling: kW
- Fan power for mech. radiator (40°C): kW
- Fan power for mech. radiator (50°C): kW
- Air flow required for mech. radiator (40°C)
- Air flow required for mech. radiator (50°C)
- Engine coolant capacity
  - (without cooling equipment): l
  - Radiator coolant capacity (40°C): l
  - Radiator coolant capacity (50°C): l
  - Max. coolant temperature (warning): °C
  - Max. coolant temperature (shutdown): °C

#### Exhaust system
- Exhaust gas temp. (after turbocharger): °C
- Exhaust gas volume: m³/s
- Maximum allowable back pressure: mbar
- Minimum allowable back pressure: mbar

#### Generator
- Protection class
- Insulation class
- Voltage regulation (steady state)
- Rado interference class

---

1 All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).
2 Emission optimized data refer to TA-Luft optimized and NEA (ORDE) optimized/Tier 2 compliant engines.
3 Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

** BE, fuel optimized: max. power available up to: open power unit 40°C/400m; TAL, EPA Tier 2 compl., NEA: standard operating conditions/open power unit 25°C/100m

Electrical outputs may vary depending on generator voltage and ambient conditions. For power outputs consult your MTU dealer.

Intake air depression/mbar: 15mbar

Exhaust back pressure/mbar: 30mbar

Engine

- 4-Cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Full flow oil filters
- Closed crankcase ventilation
- Governor-electronic isochronous ADEC/ECU9
- Common rail fuel injection
- Dry exhaust manifold
- Electric starting motor (24V)
- Fuel consumption optimized engine
- TA-Luft optimized engine
- Tier 2 optimized engine
- NEA (ORDE) optimized engine

Generator

- Leroy Somer low voltage generator
- Meets NEMA MG1, BS5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528 requirements
- Superior voltage waveform
- Solid state, volts-per-Hertz regulator
- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP 23
- less than 5% harmonic distortions
- 2/3 pitch stator windings
- No load to full load regulation
- ± 0.25% voltage regulation no load to full load
- Insulation class H, utilization acc. to H
- Radio suppression EN55011, group 1, cl. B
- Short circuit capability 3xIn for 10sec
- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds (Leroy Somer generator)
- Winding and bearing RTDs (without monitoring)
- Excitation by AREP + PMI
- Mounting of CT’s: 3x 2 core CT’s
- Voltage setpoint adjustment ±10V
- Sustained short circuit current of up to 250% of the rated current for up to 10 seconds (Marathon generator)
- Marathon low voltage generator
- Oversized generator

- Represents standard features
- Represents optional features
### Standard and optional features

#### Cooling system
- **Standard features**
  - Jacket water pump
  - Thermostat(s)
  - Air charge air cooling
  - Mechanical radiator
- **Optional features**
  - Jacket water heater

#### Control Panel
- **Standard features**
  - Pre-wired control cabinet for easy application of customized controller (V1+)
  - Island operation (V2)
  - Automatic mains failure operation with ATS (V3a)
  - Automatic mains failure operation incl. control of generator and mains breaker (V3b)
  - Island parallel operation of multiple gensets (V4)
  - Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
  - Mains parallel operation of a single genset (V6)

- **Optional features**
  - Mains parallel operation of multiple gensets (V7)
  - Basler controller
  - Deif controller
  - Complete system metering
  - Digital metering
  - Engine parameters
  - Generator protection functions
  - Engine protection
  - SAE J1939 engine ECU communications
  - Parametrization software
  - Multilingual capability
  - Multiple programmable contact inputs
  - Multiple contact outputs
  - Event recording
  - IP 54 front panel rating with integrated gasket
  - Different expansion modules
  - Remote annunciator
  - Daytank control
  - Generator winding temperature monitoring
  - Generator bearing temperature monitoring
  - Differential protection with multi-function protection relay
  - Modbus RTU-TCP gateway

#### Power Panel
- **Standard features**
  - Available in 600x600
  - Phase monitoring relay 230V/400V

- **Optional features**
  - Supply for battery charger
  - Supply for jacket water heater
  - Plug socket cabinet for 230V compatible Euro

#### Fuel system
- **Standard features**
  - Flexible fuel connectors mounted to base frame
  - Fuel filter with water separator
  - Switchable fuel filter with water separator

- **Optional features**
  - Fuel cooler

#### Starting/charging system
- **Standard features**
  - 24V starter

- **Optional features**
  - Starter batteries, cables, rack, disconnect switch
  - Battery charger
  - Redundant starter 2x7.5KW

#### Mounting system
- **Standard features**
  - Welded base frame

- **Optional features**
  - Resilient engine and generator mounting
  - Modular base frame design

#### Exhaust system
- **Standard features**
  - Exhaust bellows with connection flange
  - Exhaust silencer with 10 dB(A) sound attenuation

- **Optional features**
  - Exhaust silencer with 30 dB(A) sound attenuation
  - Exhaust silencer with 40 dB(A) sound attenuation
  - Y-connection-pipe

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

— Consult your local MTU distributor for sound data.

Emissions data

— Consult your local MTU distributor for emissions data.

Rating definitions and conditions

— Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789.
— Average load factor: ≤ 75%. Operating hours/year: unlimited
— Consult your local MTU distributor for derating information.
