

Diesel Generator Set

mtu 20V4000 DS3600

3.3 - 11 kV/50 Hz/data center continuous power/
NEA (ORDE) + Tier 2 optimized/20V4000G44F/water charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

Support

- Global product support offered

Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

Power rating

- System ratings: 3380 kVA 3390 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 100% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

Complete range of accessories available

- Control panel
- Power panel
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Electrical driven radiators
- Mechanical driven radiators
- Medium and oversized voltage alternators

Emissions

- Tier 2 optimized engine
- NEA (ORDE) optimized

Certifications

- CE certification option
- Unit conformity and certificate according to AR-N-4110. on request

Application data¹⁾

Engine			Liquid capacity (lubrication)	
Manufacturer		mtu	Total oil system capacity: l	390
Model	20	V4000G44F	Engine jacket water capacity: l	260
Туре		4-cycle	Intercooler coolant capacity: I	50
Arrangement		20V		
Displacement: l		95.4	Combustion air requirements	
Bore: mm		170	Combustion air volume: m³/s	4.3
Stroke: mm		210	Max. air intake restriction: mbar	30
Compression ratio		16.4		
Rated speed: rpm		1500	Cooling/radiator system	
Engine governor		ECU 9	Coolant flow rate (HT circuit): m³/hr	80
Max power: kWm		2807	Coolant flow rate (LT circuit): m³/hr	44
Air cleaner		dry	Heat rejection to coolant: kW (100/110%)	1010/1140
			Heat radiated to charge air cooling: kW (100/110%)	780/890
Fuel system			Heat radiated to ambient: kW	105
Maximum fuel lift: m		5	Fan power for electr. radiator (40°C): kW	105
Total fuel flow: I/min		27		
			Exhaust system	
Fuel consumption 2)	l/hr	g/kwh	Exhaust gas temp. (after engine, max.): °C	550
At 100% of power rating:	674	199	Exhaust gas temp. (before turbocharger): °C	605
At 75% of power rating:	523	206	Exhaust gas volume: m³/s	10.0
At 50% of power rating:	369	218	Maximum allowable back pressure: mbar	50
			Minimum allowable back pressure: mbar	_

Standard and optional features

System ratings (kW/kVA)

	Voltage	NEA (ORDE) optimized 40°C/1000m		
Generator model		without radiator		
		kWel	kVA*	AMPS
Leroy Somer LSA54.2 XL11 (Med. volt. Leroy Somer)	11 kV	2704	3380	177
Marathon 1040FDH7103 (Medium volt. marathon)	11 kV	2712	3390	178
Leroy Somer LSA54.2 ZL12 (MV Leroy Somer oversized)	11 kV	2704	3380	177
Marathon 1040FDH7105 (MV marathon oversized)	11 kV	2712	3390	178

^{*} cos phi = 0.8

¹ All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

² Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power and are approximate values.

Standard and optional features

Engine

■ 4-cycle ■ Closed crankcase ventilation ■ Tier 2 optimized engine Standard single stage air filter ■ Governor-electronic isochronous ■ NEA (ORDE) optimized engine Oil drain extension & shut-off valve ■ Common rail fuel injection Generator ■ 4 pole three-phase synchronous ■ Insulation class H, utilization acc. to H ■ Meets NEMA MG-1, BS 5000, IEC 60034-1, Radio suppression EN55011, group 1, cl. B VDE 0530. DIN EN 12601. AS1359 and generator ■ Short circuit capability 3xIn for 10sec Brushless, self-excited, self-regulating, ISO 8528 requirements self-ventilated ■ Winding and bearing RTDs Leroy Somer medium voltage generator ■ Digital voltage regulator (without monitoring) ☐ Marathon medium voltage generator ■ Excitation by AREP + PMI Anti condensation heater □ Oversized generator ■ Stator winding Y-connected, accessible ■ Mounting of CT's: 3x 2 core CT's neutral (brought out) ■ Winding pitch: 5/6 winding ■ Protection IP23 ■ Voltage setpoint adjustment ± 5% Cooling system Jacket water pump ☐ Electrical driven front-end cooler ■ Thermostat(s) ☐ Jacket water heater ■ Water charge air cooling ☐ Pulley for fan drive Control panel Pre-wired control cabinet for easy \square Mains parallel operation of a Multilingual capability application of customized controller (V1+) single genset (V6) ■ Multiple programmable contact inputs ☐ Island operation (V2) ☐ Mains parallel operation of Multiple contact outputs ☐ Automatic mains failure operation with multiple gensets (V7) Event recording ■ IP 54 front panel rating with ☐ Basler controller ATS (V3a) ☐ Automatic mains failure operation ☐ Deif controller integrated gasket incl. control of generator and mains ■ Complete system metering \square Remote annunciator breaker (V3b) Digital metering ☐ Daytank control \square Island parallel operation of Engine parameters ☐ Generator winding multiple gensets (V4) Generator protection functions temperature monitoring ☐ Automatic mains failure operation with ■ Engine protection ☐ Generator bearing short (< 10s) mains parallel overlap ■ SAE J1939 engine ECU communications temperature monitoring synchronization (V5) Parametrization software ☐ Modbus TCP-IP Power panel ☐ Available in 600x600 ☐ Supply for anti condensation heating ☐ Supply for battery charger

☐ Supply for jacket water heater

☐ Plug socket cabinet for 230V compatible

Euro/USA

Represents standard features

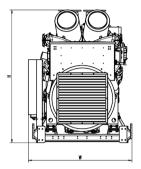

☐ Phase monitoring relay 230V/400V

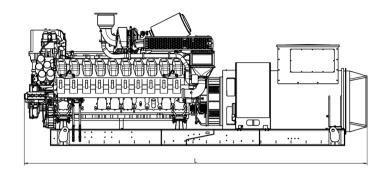

Represents optional features

Standard and optional features

Fuel system		
 Flexible fuel connectors mounted to base frame Fuel filter with water separator Fuel filter with water separator heavy-duty 	 ☐ Switchable fuel filter with water separator ☐ Switchable fuel filter with water separator heavy-duty ☐ Seperate fuel cooler 	☐ Fuel cooler integrated into cooling equipment
Starting/charging system		
■ 24V starter	☐ Starter batteries, cables, rack, disconnect switch	☐ Battery charger ☐ Redundant starter 2x 15kW
Mounting system		
Welded base frame	Resilient engine and generator mounting	■ Modular base frame design
Exhaust system		
 Exhaust bellows with connection flange Exhaust silencer with 10 dB(A) sound attenuation 	☐ Exhaust silencer with 30 dB(A) sound attenuation	Exhaust silencer with40 dB(A) sound attenuationY-connection-pipe

Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 11 kV engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	6249 x 1887 x 2412 mm	18420 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

- Consult your local *mtu* distributor for sound data.

Emissions data

- Consult your local *mtu* distributor for emissions data.

Rating definitions and conditions

- Data center continuous power ratings (DCP) apply to data center installations where a reliable utility power is available and comply with Uptime Institute Tier III and IV requirements. At constant or varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 100%.
- Consult your local *mtu* distributor for derating information.
