

# **Diesel Generator Set**

# **mtu** 16V4000 DS2750

380V – 11 kV/50 Hz/data center continuous power/ fuel consumption optimized/16V4000G34F/water charge air cooling

Optional equipment and finishing shown. Standard may vary.

# Product highlights

## Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

## Support

- Global product support offered

## Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS 5000, ISO, DIN EN and IEC standards
- NFPA 110

## Power rating

- System ratings: 2470 kVA 2600 kVA
- $-\,$  Accepts rated load in one step per NFPA 110\*  $\,$
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5\*

#### Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 100% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

#### Complete range of accessories available

- Control panel
- Power panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical and electrical driven radiators
- Medium and oversized voltage alternators

## Emissions

- Fuel consumption optimized

## Certifications

- CE certification option
- Unit certificate acc. to VDE-AR-N 4110

## Engine

3	
Manufacturer	mtu
Model	16V4000G34F
Туре	4-cycle
Arrangement	16V
Displacement: l	76.3
Bore: mm	170
Stroke: mm	210
Compression ratio	16.4
Rated speed: rpm	1500
Engine governor	ADEC (ECU 9)
Max power: kWm	2170
Air cleaner	dry
Fuel system	
Maximum fuel lift: m	5
Total fuel flow: I/min	27
Total fuel flow. (/iiii)	27
Fuel consumption <sup>2)</sup>	l/hr g/kwh
At 100% of power rating:	508 194
At 75% of power rating:	371 189
At 50% of power rating:	254 194
-	

## Liquid capacity (lubrication)

Total oil system capacity: l	300
Engine jacket water capacity: l	175
Intercooler coolant capacity: I	50
	00
Combustion air requirements	
Combustion air volume: m³/s	2.7
Max. air intake restriction: mbar	50
Cooling/radiator system	
Coolant flow (HT-circuit) at 0,3 bar: m³/hr	63
Coolant flow (HT-circuit) at 0,7 bar: m³/hr	53
Coolant flow (NT-circuit) at 0,3 bar: m³/hr	33
Coolant flow (NT-circuit) at 0,7 bar: m³/hr	25
Heat rejection to coolant: kW	785
Heat radiated to charge air cooling: kW	505
Heat radiated to ambient: kW	90
	00
Exhaust system	
Exhaust gas temp. (after engine): °C	450
Exhaust gas temp., max (after engine): °C	550
Exhaust gas temp. (before turbocharger): °C	680
Exhaust gas volume: m <sup>3</sup> /s	6.8
Maximum allowable back pressure: mbar	50
Maximum allowable back pressure. Indat	50

1 All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

2 Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

## Standard and optional features

#### Engine

- 4-cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Closed crankcase ventilation
- Governor-electronic isochronous
- Common rail fuel injection
- Fuel consumption optimized engine
- □ Tier 2 optimized engine
- □ NEA (ORDE) optimized engine

#### Generator

- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP23

- Insulation class H, utilization acc. to H
- Radio suppression EN 55011, group 1, cl. B
- Short circuit capability 3xIn for 10sec Winding and bearing RTDs
- (without monitoring)

□ Mechanical radiator

□ Jacket water heater

- Excitation by AREP
- Mounting of CT's: 3x 2 core CT's
- Winding pitch: 2/3 winding
- Voltage setpoint adjustment ± 10%

□ Electrical driven front-end cooler

- Meets NEMA MG-1, BS 5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS 1359 and ISO 8528-3 requirements
- Leroy Somer low voltage generator
- □ Oversized generator
- □ Medium voltage generator

- Cooling system
- Jacket water pump
- Thermostat(s)

Control panel

- Water charge air cooling
- Unit cabling with coded plugs for easy connection of customer-specific controls (VO)
- □ Pre-wired control cabinet for easy application of customized controller (V1+)
- □ Island operation (V2)
- □ Automatic mains failure operation with ATS (V3a)
- $\Box$  Automatic mains failure operation incl. control of generator and mains breaker (V3b)
- □ Island parallel operation of multiple gensets (V4)
- □ Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
- Connectivity

The engine system automatically collects and transfers engine data to the manufacturer from time to time. The data is used by the manufacturer for the purposes of product

Represents standard features Represents optional features

a single genset (V6)

Exhaust bellows with connection flange	Exhaust silencer with	Exhaust silencer with

- □ Exhaust silencer with 10 dB(A) sound attenuation
- 30 dB(A) sound attenuation
- 40 dB(A) sound attenuation □ Y-connection-pipe

## Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	4880 x 1810 x 2350 mm	14550 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

## Sound data

## Emissions data

- Consult your local *mtu* distributor for sound data.
- Consult your local *mtu* distributor for emissions data.

## Rating definitions and conditions

- Data center continuous power ratings (DCP) apply to data center installations where a reliable utility power is available and comply with Uptime Institute Tier III and IV requirements. At constant or varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 100%.
- Consult your local *mtu* distributor for derating information.
