### Rating definitions and conditions

- Ambient capability factor at 984 ft (300 m). Consult your local mtu Distributor for other altitudes.
- Standby ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. No overload capability for this rating. Ratings are in accordance with ISO 3046-1, BS 5514, and AS 2789. Average load factor: ≤ 85%.
- Nominal ratings at standard conditions: 25 °C and 300 meters (77 °F and 1,000 feet).
- Deration factor:
  - Consult your local *mtu* Distributor for altitude derations.
  - Consult your local *mtu* Distributor for temperature derations.
