# SERIES 2000 GX6

## for power generation standby applications with water-to-air charge air cooling

All dimensions are approximate, for complete information refer to the installation drawing.

Engine model	
Bore/stroke mm (in)	135/156 (5.3/6.15)
Cylinder configuration	90°V
Displacement I (cu in)	2.23 (136)
Displacement, total I (cu in)	16V: 35.68 (2177)
Fuel specification	EN 590, Grade No.1-D/2-D (ASTM D975-00)

Application group	Power definition			
Standby power (3D) Emergency standby power, IFN		Load factor: ≤ 85%, operating hours: max. 500/year, overload: fuel stop power (IFN)		
Data center continuous power (3F)  Heavy duty for DCP, unrestricted, ICXN		Load factor: ≤ 100%, operating hours: unrestricted, overload capability: 10% (ICXN)		

Power definition according to ISO 3046 (ratings also correspond to SAE J 1995 and SAE J 1349 standard conditions). Consult your *mtu* distributor for the rating that will apply to your specific application. Rated power is without fan drive. The power consumption of any fan drive has to be deducted during designing of a generator set.

### Standby power (3D)

Engine type	Rated power kW (bhp) at	Optimization				
	1800 rpm (60Hz)	Х	3	19		
16V 2000 G76S	1097 (1471)	Х	х	Х		
16V 2000 G86S	1371 (1839)	Х	Х	Х		

Fan power requirement not considered, reference to emission level in price list

- Fuel consumption optimized
- US EPA Stationary EMERG Tier 2 (40 CFR 60)
- US EPA Nonroad Tier 2 compliant (40 CFR 89)

#### Data center continuous power (3F)

Engine type	Rated power kW (bhp) at		Optimization		
	1800 rpm (60Hz)	X	3	19	
16V 2000 G26S	998 (1338)	Х	Х	Х	

Fan power requirement not considered, reference to emission level in price list

- Fuel consumption optimized
  US EPA Stationary EMERG Tier 2 (40 CFR 60)
- US EPA Nonroad Tier 2 compliant (40 CFR 89)

Starting system	1 electric starter (24 VDC/2-pole)			
Fuel system	Electronically controlled common-rail high-pressure injection system, dual engine mounted fuel filters			
Lube oil system	Forced feed lubrication system with piston cooling, lube oil circulation pump, lube oil filter, lube oil heat exchanger			
Combustion air system	2 exhaust turbochargers, water-to-air intercooler integrated in radiator			
Cooling system	Coolant circulation pump and coolant thermostat for jacket water circuit			
Engine mounting	Set of engine mounting brackets for resilient mount			
Engine management	Integrated electronic engine control and monitoring system ADEC, customer interface "Smart Connect"			
Optional equipment				
Starting system	Compressed air, redundant starting system: electric/electric; air/air; electric/air			
Fuel system	Fuel pre-filter, special fuel pre-filter with water separator			
Combustion air system	Heavy duty air filters			
Cooling system	Engine mounted fan drive			
Engine mounting	Resilient engine mounts (rubber elements), rigid engine mounting			
Auxiliary power supply	Battery charging alternator			

#### Reference conditions:

Standard equipment

- > Intake-air temperature: 25°C (77°F)
- > Ambient air pressure: 1 bar (14.5 psi) > Altitude above sea level: 100 m (328 ft)

 $\label{lem:customization} Customization\ possible.\ Engines\ illustrated\ in\ this\ document$ may feature options not fitted as standard. For more information please contact your *mtu* dealer.
