Diesel Generator Set

**mtu 12V4000 DS2250**

380V – 11 kV/50 Hz/prime power for stationary emergency/
fuel consumption optimized/12V4000G34F/water charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

**Benefits**
- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals

**Support**
- Global product support offered

**Standards**
- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets NEMA MG1, BS 5000, ISO, DIN EN and IEC standards
- NFPA 110

**Power rating**
- System ratings: 2020 kVA - 2100 kVA
- Accepts rated load in one step per NFPA 110*
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5*

**Performance assurance certification (PAC)**
- Engine-generator set tested to ISO 8528-5 for transient response
- 85% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

**Complete range of accessories available**
- Control panel
- Power panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical and electrical driven radiators
- Medium and oversized voltage alternators

**Emissions**
- Fuel consumption optimized

**Certifications**
- CE certification option
- Unit certificate acc. to VDE-AR-N 4110

* Changes to the standard parameter sets (alternator-regulator and genset-controller) are necessary
Application data

Engine
Manufacturer
Model
Type
Arrangement
Displacement: l
Bore: mm
Stroke: mm
Compression ratio
Rated speed: rpm
Engine governor
Max power: kWm
Air cleaner

Fuel system
Maximum fuel lift: m
Total fuel flow: l/min

Fuel consumption
At 100% of power rating:
At 75% of power rating:
At 50% of power rating:

Liquid capacity (lubrication)
Total oil system capacity: l
Engine jacket water capacity: l
Intercooler coolant capacity: l

Combustion air requirements
Combustion air volume: m³/s
Max. air intake restriction: mbar

Cooling/radiator system
Coolant flow rate (HT circuit): m³/hr
Coolant flow rate (LT circuit): m³/hr
Heat rejection to coolant: kW
Heat radiated to charge air cooling: kW
Heat radiated to ambient: kW
Fan power for electr. radiator (40°C): kW

Exhaust system
Exhaust gas temp. (after engine): °C
Exhaust gas temp., max (after engine): °C
Exhaust gas temp. (before turbocharger): °C
Exhaust gas volume: m³/s
Maximum allowable back pressure: mbar

Standard and optional features

System ratings (kW/kVA)

1 All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).
2 Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.
## Engine
- 4-cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Closed crankcase ventilation
- Governor-electronic isochronous
- Common rail fuel injection
- Fuel consumption optimized engine

## Generator
- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP23
- Insulation class H, utilization acc. to H
- Radio suppression EN 55011, group 1, cl. B
- Short circuit capability 3xIn for 10sec
- Winding and bearing RTDs
  (without monitoring)
- Excitation by AREP + PMI
- Mounting of CTs: 3x 2 core CTs
- Winding pitch: 2/3 winding
- Voltage setpoint adjustment ± 5%
- Meets NEMA MG-1, BS 5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS 1359 and ISO 8528-3 requirements
- Leroy Somer low voltage generator
- Marathon low voltage generator
- Oversized generator
- Medium voltage generator

## Cooling system
- Jacket water pump
- Thermostat(s)
- Water charge air cooling
- Mechanical radiator
- Electrical driven front-end cooler
- Jacket water heater
- Pulley for fan drive

## Control panel
- Unit cabling with coded plugs for easy connection of customer-specific controls (V0)
- Pre-wired control cabinet for easy application of customized controller (V1+)
- Island operation (V2)
- Automatic mains failure operation with ATS (V3a)
- Automatic mains failure operation incl. control of generator and mains breaker (V3b)
- Island parallel operation of multiple gensets (V4)
- Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
- Mains parallel operation of a single genset (V6)
- Mains parallel operation of multiple gensets (V7)
- Basler controller
- Deif controller
- Complete system metering
- Digital metering
- Engine parameters
- Generator protection functions
- Engine protection
- SAE J1939 engine ECU communications
- Parametrization software
- Multilingual capability
- Multiple programmable contact inputs
- Multiple contact outputs
- Event recording
- IP 54 front panel rating with integrated gasket
- Different expansion modules
- Remote annunciator
- Daytank control
- Generator winding temperature monitoring
- Generator bearing temperature monitoring
- Modbus TCP-IP

## Connectivity
The engine system automatically collects and transfers engine data to the manufacturer from time to time. The data is used by the manufacturer for the purposes of product development and improvement as well as service optimization. Users can log in or register via https://mtu-go.com and also gain insight into the data.
Standard and optional features

Power panel

☐ Supply electrical driven radiator from 45kW – 75kW

Circuit breaker/power distribution

☐ 3-pole circuit breaker  ☐ Electrical-actuated circuit breaker  ☐ Base frame mounted GCB, pre-wired with generator, ready for commissioning

☐ 4-pole circuit breaker

Fuel system

☐ Flexible fuel connectors mounted to base frame

☐ Fuel filter with water separator

☐ Fuel filter with water separator heavy-duty

☐ Switchable fuel filter with water separator

☐ Switchable fuel filter with water separator heavy-duty

☐ Separate fuel cooler

☐ Fuel cooler integrated into cooling equipment

Starting/charging system

☐ 24V starter

☐ Redundant starting system

☐ Starter batteries, cables, rack, disconnect switch (lockable)

☐ Battery charger

☐ Alternator

Mounting system

☐ Welded base frame

☐ Resilient engine and generator mounting

☐ Modular base frame design

☐ Base frame mounting on foundation/base plate with using clamping brackets

Exhaust system

☐ Exhaust bellows with connection flange

☐ Exhaust silencer with 10 dB(A) sound attenuation

☐ Exhaust silencer with 30 dB(A) sound attenuation

☐ Exhaust silencer with 40 dB(A) sound attenuation

☐ Y-connection-pipe

☐ Flexible fuel connectors mounted to base frame

☐ Fuel filter with water separator

☐ Fuel filter with water separator heavy-duty

☐ Switchable fuel filter with water separator

☐ Switchable fuel filter with water separator heavy-duty

☐ Separate fuel cooler

☐ Fuel cooler integrated into cooling equipment

☐ 24V starter

☐ Redundant starting system

☐ Starter batteries, cables, rack, disconnect switch (lockable)

☐ Battery charger

☐ Alternator

☐ Welded base frame

☐ Resilient engine and generator mounting

☐ Modular base frame design

☐ Base frame mounting on foundation/base plate with using clamping brackets

☐ Exhaust bellows with connection flange

☐ Exhaust silencer with 10 dB(A) sound attenuation

☐ Exhaust silencer with 30 dB(A) sound attenuation

☐ Exhaust silencer with 40 dB(A) sound attenuation

☐ Y-connection-pipe
Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

Sound data

Consult your local mtu distributor for sound data.

Emissions data

Consult your local mtu distributor for emissions data.

Rating definitions and conditions

Standby ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO-3046-1, BS 5514 and AS 2789. Average load factor: ≤ 85%.

Operating hours/year: max. 500.

Consult your local mtu distributor for derating information.
