Diesel Generator Set

MTU 16V2000 DS1250

380V - 415V/50 Hz/prime/fuel consumption optimized/
NOx emission optimized/16V2000G36F/air charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

Benefits
— Low fuel consumption
— Optimized system integration ability
— High reliability and availability of power
— Long maintenance intervals
— Optimized ratio between size and power
— Wide operating range without derating

Support
— Global product support offered

Standards
— Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
— Generator set complies to G3 according to ISO 8528
— Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
— NFPA 110

Power rating
— System rating: 1135 kVA
— Accepts rated load in one step per NFPA 110
— Generator set complies to G3 according to ISO 8528-5
— Generator set exceeds load steps according to ISO 8528-5

Performance assurance certification (PAC)
— Engine-generator set tested to ISO 8528-5 for transient response
— 75% load factor for prime power applications
— Verified product design, quality and performance integrity
— All engine systems are prototype and factory tested

Complete range of accessories available
— Control panel
— Power panel
— Fuel system
— Fuel connections with shut-off valve mounted to base frame
— Starting/charging system
— Exhaust system
— Mechanical radiator
— Oversized voltage alternators

Emissions
— Fuel consumption optimized
— NOx emission optimized, Tier 2 compliant and NEA (ORDE) optimization optionally available

Certifications
— CE certification option
— VDE4110 certification

1 All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).
2 Emission optimized data refer to NOx emission optimized and NEA (ORDE) optimized/Tier 2 compliant engines.
3 Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

** BE, fuel optimized: max. power available up to: open power unit 40°C/400m; NOx emission optimized, EPA Tier 2 compl., NEA: standard operating conditions/open power unit 25°C/100m  
Electrical outputs may vary depending on generator voltage and ambient conditions. For power outputs consult your MTU dealer.  
Intake air depression/mbar: 15mbar  
Exhaust back pressure/mbar: 30mbar

### Engine
- 4-cycle
- Standard single stage air filter
- Oil drain extension & shut-off valve
- Full flow oil filters
- Closed crankcase ventilation
- Governor-electronic isochronous ADEC/ECU9
- Common rail fuel injection
- Dry exhaust manifold
- Electric starting motor (24V)
- Fuel consumption optimized engine
- NOx emission optimized engine
- Tier 2 optimized engine
- NEA (ORDE) optimized engine

### Generator
- Leroy Somer low voltage generator
- Meets NEMA MG1, BS5000, IEC 60034-1, VDE 0530, DIN EN 12601, AS1359 and ISO 8528 requirements
- Superior voltage waveform
- Solid state, volts-per-Hertz regulator
- 4 pole three-phase synchronous generator
- Brushless, self-excited, self-regulating, self-ventilated
- Digital voltage regulator
- Anti condensation heater
- Stator winding Y-connected, accessible neutral (brought out)
- Protection IP 23
- less than 5% harmonic distortion
- 2/3 pitch stator windings
- No load to full load regulation
- ± 0.25% voltage regulation no load to full load
- Insulation class H, utilization acc. to H
- Radio suppression EN55011, group I, cl. B
- Short circuit capability 3xIn for 10sec
- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds (Leroy Somer generator)
- Winding and bearing RTDs (without monitoring)
- Excitation by AREP + PMI
- Mounting of CT’s: 3x 2 core CT’s
- Voltage setpoint adjustment ±10V
- Sustained short circuit current of up to 250% of the rated current for up to 10 seconds (Marathon generator)
- Marathon low voltage generator
- Oversized generator

- Represents optional features
## Standard and optional features

### Cooling system
- □ Jacket water pump
- □ Thermostat(s)
- □ Air charge air cooling
- □ Mechanical radiator
- □ Jacket water heater

### Control Panel
- □ Pre-wired control cabinet for easy application of customized controller (V1+)
- □ Automatic mains failure operation with ATS (V2)
- □ Automatic mains failure operation incl. control of generator and mains breaker (V3)
- □ Island parallel operation of multiple gensets (V4)
- □ Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
- □ Mains parallel operation of a single genset (V6)
- □ Mains parallel operation of multiple gensets (V7)
- □ Basler controller
- □ Deif controller
- □ Complete system metering
- □ Digital metering
- □ Engine parameters
- □ Generator protection functions
- □ Engine protection
- □ SAE J1939 engine ECU communications
- □ Parametrization software
- □ Multilingual capability
- □ Multiple programmable contact inputs
- □ Multiple contact outputs
- □ Event recording
- □ IP 54 front panel rating with integrated gasket
- □ Different expansion modules
- □ Remote annunciator
- □ Daytank control
- □ Generator winding- and bearing temperature monitoring
- □ Differential protection with multi-function protection relay
- □ Modbus TCP-IP

### Power Panel
- □ Available in 600x600
- □ Phase monitoring relay 230V/400V
- □ Supply for battery charger
- □ Supply for jacket water heater
- □ Plug socket cabinet for 230V compatible Euro

### Fuel system
- □ Flexible fuel connectors mounted to base frame
- □ Fuel filter with water separator
- □ Switchable fuel filter with water separator
- □ Fuel cooler

### Starting/charging system
- □ 24V starter
- □ Starter batteries, cables, rack, disconnect switch
- □ Battery charger
- □ Redundant starter 2x 7.5KW

### Mounting system
- □ Welded base frame
- □ Resilient engine and generator mounting
- □ Modular base frame design

### Exhaust system
- □ Exhaust bellows with connection flange
- □ Exhaust silencer with 10 dB(A) sound attenuation
- □ Exhaust silencer with 30 dB(A) sound attenuation
- □ Exhaust silencer with 40 dB(A) sound attenuation
- □ Y-connection-pipe

- □ Represents standard features
- □ Represents optional features
Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

<table>

Sound data

Consult your local MTU distributor for sound data.

Emissions data

Consult your local MTU distributor for emissions data.

Rating definitions and conditions

Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789.

Average load factor: ≤ 75%. Operating hours/year: unlimited

Consult your local MTU distributor for derating information.
