

Diesel Generator Set

mtu 12V4000 DS2250

380V – 11 kV/50 Hz/prime power/fuel consumption optimized 12V4000G34F/water charge air cooling

CERTIFIED

Product highlights

Benefits

- Approved for renewable fuels (e.g. HVO)
- Low fuel consumption
- Optimized system integration ability
- High reliability
- High availability of power
- Long maintenance intervals
- up to 90% CO2 reduction with HVO

Support

- Global product support offered

Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to ISO 8528
- Generator meets EC 60034-1, ISO 8528-3; IEC 60044-1;
 Declaration of conformity; EN55011, group 1, cl. B
- NFPA 110*

Power rating

- System ratings: 2020 kVA 2100 kVA
- Accepts rated load in one step per NFPA 110*
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5*

Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 75% load factor
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

Complete range of accessories available

- Control panel
- Power panel
- Circuit breaker/power distribution
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical and electrical driven radiators
- Medium and oversized voltage alternators

Emissions

Fuel consumption optimized

Certifications

- CE certification option
- Unit certificate acc. to VDE-AR-N 4110

Renew able

Application data 1)

Engine			Liquid capacity (lubrication)	
Manufacturer		mtu	Total oil system capacity: l	260
Model		12V4000G34F	Engine jacket water capacity: I	160
Туре		4-cycle	Intercooler coolant capacity: l	40
Arrangement		12V		
Displacement: l		57.2	Combustion air requirements	
Bore: mm		170	Combustion air volume: m³/s	2.2
Stroke: mm		210	Max. air intake restriction: mbar	50
Compression ratio		16.4		
Rated speed: rpm		1500	Cooling/radiator system	
Engine governor	ECU 9		Coolant flow rate (HT circuit): m ³ /hr	55
Max power: kWm	1755		Coolant flow rate (LT circuit): m ³ /hr	30
Air cleaner		dry	Heat rejection to coolant: kW	690
			Heat radiated to charge air cooling: kW	425
Fuel system			Heat radiated to ambient: kW	75
Fuel specification	EN 590, Grade No.1-D/2-D (A	ASTM D975-00),	Fan power for electr. radiator (40°C): kW	55
	EN 15	5940 (e.g. HVO)		
Maximum fuel lift: m		5	Exhaust system	
Total fuel flow: I/min		27	Exhaust gas temp. (after engine): °C	440
			Exhaust gas temp., max (after engine): °C	550
Fuel consumption 2)	l/hr	g/kwh	Exhaust gas temp. (before turbocharger): °C	645
At 100% of power rating:	413	195	Exhaust gas volume: m³/s	5.5
At 75% of power rating:	307	193	Maximum allowable back pressure: mbar	50
At 50% of power rating:	211	199

Connectivity

transfers engine data to the manufacturer from time to time. The data is used by the	development and improvement as well as service optimization.	https://mtu-go.com and also gain insight int the data.	
Power panel			
□ Supply electrical driven radiator from 45kW – 75kW			
Circuit breaker/power distribution			
☐ 3-pole circuit breaker ☐ 4-pole circuit breaker	☐ Electrical-actuated circuit breaker	☐ Base frame mounted GCB, pre-wired with generator, ready for commissioning	
Fuel system			
 Flexible fuel connectors mounted to base frame Fuel filter with water separator Fuel filter with water separator heavy-duty 	 Switchable fuel filter with water separator Switchable fuel filter with water separator heavy-duty Seperate fuel cooler 	☐ Fuel cooler integrated into cooling equipment	
Starting/charging system			
24V starterRedundant starting system	☐ Starter batteries, cables, rack, disconnect switch (lockable)	☐ Battery charger ☐ Alternator	
Mounting system			
Welded base frameResilient engine and generator mounting	 Modular base frame design Base frame mounting on foundation/base plate with using clamping brackets 	□ Spring mounts with 95% degree of isolation	
Exhaust system			
Exhaust bellows with connection flangeExhaust silencer with10 dB(A) sound attenuation	☐ Exhaust silencer with 30 dB(A) sound attenuation	□ Exhaust silencer with40 dB(A) sound attenuation□ Y-connection-pipe

- ☐ Represents optional features

Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	4077 x 1810 x 2330 mm	11.130 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

- Consult your local *mtu* distributor for sound data.

Emissions data

- Consult your local *mtu* distributor for emissions data.

Rating definitions and conditions

- Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789.
- Average load factor: ≤ 75%
- Consult your local *mtu* distributor for derating information.
