

Diesel Generator Set

mtu 12V1600 DS880

Renewable fuel

380 - 415 V/800 kVA/50 Hz/data center continuous power/

12V1600G21F

Open Power Unit A2A (TD)

Open Power Unit W2A (TB)

Thower offic was (1b)

Optional equipment shown. Standard equipment may vary.

Product highlights

Benefits

- Approved for renewal fuels (e.g. HVO)
- Industry-leading average load factor
- Low fuel consumption
- Emissions optimizations available
- High availability and reliability
- High load acceptance
- Long maintenance intervals
- Best-in-class low load capability

Support

- Global product support offered
- Attractive overhaul solutions

Standards

- Engine-generator set is designed and manufactured in facilities certified to ISO 2008:9001
- Generator set complies to ISO 8528 and fullfills performance level G3
- Generator meets BS5000, ISO, DIN EN and IEC standards

Available emissions optimizations

- Fuel consumption optimized
- EPA Nonroad T2 compliant
- NEA Singapore for Off Road Diesel Engines (ORDE)

Wide standard scope of supply

- 4P circuit breaker
- Island operation control panel
- Battery charger

Complete range of accessories available

- Sound attenuated enclosures
- Fuel system accessories
- AMF/parallel operation control panel
- Range of additional electronical options
- Radiator for hot ambient condition
- VDE certification

Warranty

Standard 36 months warranty after shipment

Cooling system

- Air-to-air charge air cooling A2A (TD)
- Water-to-air charge-air cooling W2A (TB)

For a comprehensive listing of features, please refer to standard and optional features beginning on page 2.

Application data 1)

Voltage regulation

Exciting system

Engine		Electrical	
Manufacturer	mtu	Electric system volts DC	24
Model	12V1600G21F	Number of batteries (optional)	2
Туре	4-cycle	Capacity: Ah 100 AH	H, 12 VDC
Arrangement	12V		
Displacement: I	22.44	Air requirements	
Bore: mm	126	Aspirating: m³/min	57.6
Stroke: mm	150	Max. air intake restriction: mbar	30
Compression ratio	15.89		
Rated rpm	1,500	Exhaust system	
Engine governor	ECU 9	Gas temp. (stack): °C	481
Gross power: kWm	715	Gas volume at stack temp.: m³/min	135.6
Air cleaner	dry	Maximum allowable back pressure: kPa	8.5
Fuel specification		Cooling/radiator system	
EN 590, Grade No.1-D/2-D (ASTM D975-00), EN 159	940 (e.g. HVO)	Ambient capacity of radiator: OPU (EPU) in °C	40 (35)
		Pressure on rad. exhaust: kPa	0.2
Fuel system		Heat rejection to coolant: kW	280
Max. fuel flow: I/hr	336	Heat rejection to charge air: kW	185
Fuel tank capacity: OPU (EPU) in I	800 (950)	Coolant flow rate (HT circuit): m³/hr	26
Autonomy: OPU (EPU) h calculated @100% load	4.8 (5.7)	Coolant flow rate (LT circuit for TB): m ³ /hr	28.8
		Heat radiated to charge air cooling (TB): kW	185
Fuel consumption 2)		Input pressure customer radiator (TB): bar (rel.)	1.4
At 100% of power rating: I/h / g/kWh	167.6 / 194.6	Max. pressure loss customer radiator (TB): bar	0.7
At 75% of power rating: I/h / g/kWh	126.6 / 195.9	Heat dissipated by engine coolant: kW	280
At 50% of power rating: I/h / g/kWh	88.8 / 206.2	Heat radiated to ambient: kW	40
		Air flow required for mech. radiator (40°C) cooled unit: m ³ /s	18.7
Liquid capacity		Engine coolant capacity (without cooling equipment): l	65
Total oil system: l	72.5	Radiator coolant capacity (TD) (40°C): I	58
Total coolant capacity: I	65	Radiator coolant capacity (LT circuit for TB): l	23
		Max. coolant temperature (warning): °C	102
Generator		Max. coolant temperature (shutdown): °C	105
Generator brand	Leroy Somer		
Generator type	LSA 49.3 M8		
Insulation class	H-class		
Bearing	single bearing		
Enclosure	IP23		

digital (D350)

self-excited, brushless (AREP)

All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

Standard and optional features

System ratings (kW/kVA)

Generator model	Voltage	mtu 12V1600 DS880 - data center continous operation		
		kWel¹	kVA²	AMPS
Leroy Somer LSA 49.3 M8 (Low voltage 400 V	380 V	640	800	1216
	400 V	640	800	1155
Leroy Somer standard) ³	415 V	640	800	1113
Leroy Somer LSA 50.2 M6	380 V	640	800	1216
(Low voltage Leroy Somer oversized - VDE) ⁴ 400 V 415 V	640	800	1155	
	415 V	640	800	1113

Standard and optional features

- **Engine** ■ mtu Series 1600 diesel engine Coolant circulation pump ■ Battery charge alternator ■ Engine mounted fan drive **Alternator** ☐ Low voltage 380V Premium high efficiency alternator ■ Insulation class: H ■ 3-Phase, single bearing, synchronous, ■ Protection class: IP 23 ☐ Low voltage 415V brushless, self regulating, self ventilating, ■ Low voltage 400V ☐ Anti-condesation heater self exciting (AREP) ☐ Oversized alternator (only for VDE option Digital voltage regulation (DVR) in OPU) Cooling system Air-to-air charge air cooling - A2A (TD): ■ Base frame monunted front-type radiator ■ Integrated air-to-air charge air cooling ■ Integrated expansion tank for jacket water and charge air cooling unit (A2A) ☐ Duct flange Low coolant level sensor Water-to-air charge air cooling - W2A (TB): Coolant pump ■ Integrated water-to-air heat exchanger on ☐ HT-piping with flexible engine connection
- Manifold with thermostatic valves
- base frame with safety covers

Genset controller & control panel

- Control panel with measurement devices and genset controller (A-side)
- Genset controller for island operation
- \Box Genset controller for island parallel operation
- $\hfill\Box$ Genset controller for mains parallel operation
- ☐ Modbus RTU-TCP Gateway/Ethernet or bus system
- \square Without genset controller (only for OPU)

Standard and optional features

Circuit breaker		
 4 pole circuit breaker, motorized with controller (inside power panel) 	Without circuit breaker (only for OPU & VDE)	
Starting and charging system		
1 x 24V electrical starterElectric battery charger (inside control panel)	Starting batteries with battery rack,battery disconnector and cablingJacket water preheating system	☐ Redundant starting system (2x 24V electric starters, 2x starting battery sets, 2x electric battery charger)
Fuel system		
■ Common rail fuel injection system ■ Fuel main filter	Standard engine interfaceHeavy duty fuel prefilter with water separator	☐ Fuel cooler radiator mounted ☐ Removable fuel tank (only for OPU)
Oil system		
Oil dip stickOil drain	■ Pre-filled with premium engine oil □ Lube oil extraction handpump	
Air intake system		
Exhaust turbochargersStandard dry type air filters	Charge air intercoolerAir intake pipework	 Heavy-duty two stage air filters with mechanic dust evacuation
Exhaust system (OPU)		
Standard engine interfaceExhaust elbows	Exhaust bellowsExhaust silencers 10 db(A)	Exhaust silencers 30 db(A)Exhaust silencers 40 db(A)
Base frame (OPU)		
 Resilient mounting for engine and alternator 	Lifting lugsForklift pockets	■ Fits in 20" ISO high cube container ■ Integrated spill-proof design
Enclosure (EPU) - optional		
 Protection class: IP23 Forklift pockets Fits in 20" ISO high cube container Integrated fuel tank Integrated spill-proof design 	 Control panel with genset controller (A-side) Power panel including circuit breaker (B-side) Basic sound attenuation "Silent" 78 dB(A) 	 Integrated exhaust system with silencers inside the enclosure Advanced sound attenuation "Super-Silent" 70dB(A)

- Represents standard features
- ☐ Represents optional features

Standard and optional features

Certificates & documentation

■ CE certificate

- Maintenance schedule, fluids & lubricants specification, genset & components manuals
- □ VDE-AR-4110 German Grid Code compliance (only for OPU, no circuit breaker)

Packing

■ Standard seaworthy packing

Accessories

☐ Spare parts package

Weights and dimensions

Open Power Unit A2A (TD)

Open Power Unit W2A (TB)

Enclosed Power Unit

Outline drawing above is for reference only. Do not use for installation design. For unit-specific template drawings, please see our website.

System	Dimensions (LxWxH)	Weight (wet/with standard accessories)
Open power unit (OPU) (A2A/TD)	3630 x 2060 x 2525 mm	5700 kg
Open power unit (OPU) (W2A/TB)	3762 x 2095 x 1960 mm	5450 kg
Enclosed power unit (EPU) without tail pipe	5900 x 2245 x 2530 mm	8900 kg
Enclosed power unit (EPU) with tail pipe*	5900 x 2245 x 3500 mm	9000 kg

Consult the factory for accurate weights and dimensions for your specific engine-generator set. Lengths may vary with other voltages. Do not use for installation design.

Sound data

Unit type	Prime 75% load
Open power unit (dB(A) at 1m)	112
Enclosed power unit (dB(A) at 7m)	77,7

Sound data is provided at 7 m (23 ft).

Rating definitions and conditions

- Data center continuous power (DCP) ratings apply to data center installations where a reliable utility power is available and comply with Uptime Institute Tier III and IV requirements. At constant or varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514 and AS 2789. Average load factor: ≤ 100%
- Consult your local *mtu* distributor for derating information.
 Materials and specifications subject to change without notice.

^{*} Tail pipe will be supplied loose
