<sup>\*</sup> Consult the factory for alternate configuration. Generator model may end with -M or -R, depending on selection.

<sup>†</sup> UL 2200 offered

<sup>\*</sup> CSA offered

#### Certifications and standards

- Emissions
  - Fuel Consumption Optimized (FCO)
- Generator set is designed and manufactured in facilities certified to standards ISO 9001:2008 and ISO 14001:2004
- Seismic certification optional
  - 2021 IBC certification
  - HCAI pre-approval
- UL 2200 optional (refer to System ratings for availability)
- CSA optional (refer to System ratings for availability)
  - CSA C22.2 No. 100
  - CSA C22.2 No. 14

- Performance Assurance Certification (PAC)
  - Generator set tested to ISO 8528-5 for transient response
  - Verified product design, quality, and performance integrity
  - All engine systems are prototype and factory tested
- Power rating
  - Accepts rated load in one step per NFPA 110
  - Permissible average power output during 24 hours of operation is approved up to 85%

#### Standard features\*

- Single source supplier
- Global product support
- Two (2) Year/3,000 Hour Basic Limited Warranty
- 16V4000 diesel engine
  - 76.3 liter displacement
  - Common rail fuel injection
  - 4-cycle
- HVO and GtL fuels meeting fuel specification EN15940
- Complete range of accessories
- Cooling system
  - Integral set-mounted
  - Engine-driven fan

- Generator
  - Brushless, rotating field generator
  - 2/3 pitch windings
  - Permanent Magnet Generator (PMG) supply to regulator
  - 300% short circuit capability
- Digital control panel(s)
  - UL recognized, CSA certified, NFPA 110
  - Complete system metering
  - LCD display

# Standard equipment\*

#### **Engine**

- Air cleaners
- Oil pump
- Oil drain extension and shut-off valve
- Full flow oil filters
- Closed crankcase ventilation
- Jacket water pump
- Inter cooler water pump
- Thermostats
- Blower fan and fan drive
- Radiator unit mounted
- Electric starting motor 24V
- Governor electronic isochronous
- Base structural steel
- SAE flywheel and bell housing
- Charging alternator 24V
- Battery box and cables
- Flexible fuel connectors
- Flexible exhaust connection
- Fuel consumption optimized

#### Generator

- NEMA MG1, IEEE, and ANSI standards compliance for temperature rise and motor starting
- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds
- Self-ventilated and drip-proof
- Superior voltage waveform

- Digital, solid state, volts-per-hertz regulator
- Brushless alternator with brushless pilot exciter
- 4 pole, rotating field
- 130 °C standby temperature rise
- 2-bearing, sealed
- Flexible coupling
- Full amortisseur windings
- 125% rotor balancing
- 3-phase voltage sensing
- ± 0.25% voltage regulation no load to full load
- 100% of rated load one step
- 5% maximum total harmonic distortion

### Digital control panel(s)

- Digital metering
- Engine parameters
- Generator protection functions
- Engine protection
- CANBus ECU communications
- Windows®-based software
- Multilingual capability
- Communications to remote annunciator
- Programmable input and output contacts
- UL recognized, CSA certified, CE approved
- Event recording
- IP 54 front panel rating with integrated gasket
- NFPA 110 compatible

# Application data

| Engine   |                               | Fuel consumption  |                |
|--|-------------------------------|---|----------------|
| Manufacturer                                   | mtu                           | At 100% of power rating: L/hr (gal/hr)                      | 692 (183)      |
| Model  | 16V4000G94S                   | At 75% of power rating: L/hr (gal/hr)                       | 495 (131)      |
| Туре   | 4-cycle                       | At 50% of power rating: L/hr (gal/hr)                       | 336 (89)       |
| Arrangement                                    | 16-V                          |   |                |
| Displacement: L (in³)                          | 76.3 (4,656)                  | Cooling - radiator system                                   |                |
| Bore: cm (in)                                  | 17 (6.69)                     | Ambient capacity of radiator: °C (°F)                       | 45 (113)       |

| Recommended fuel                               | diesel #2/HVO                 |   |                |
| Total fuel flow: L/hr (gal/hr)                 | 1,200 (317)                   |   |                |

## Weights and dimensions

Drawing above for illustration purposes only, based on standard open power 480 volt generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

| System                | Dimensions (LxWxH)                                 | Weight                |
|-----------------------|--|-----------------------|
| Open Power Unit (OPU) | 6,595 x 2,446 x 3,390 mm (259.6 x 96.3 x 133.5 in) | 21,385 kg (47,154 lb) |

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific generator set.

#### Sound data

| Unit type            | Standby full load |
|----------------------|-------------------|
| Level O (OPU): dB(A) | 93.6              |

Sound data is provided at 7 m (23 ft). Generator set tested in accordance with ISO 8528-10 and with infinite exhaust.

#### **Emissions data**

| NO <sub>x</sub> + NMHC | СО   | PM   |
|------------------------|------|------|
| 4.85                   | 0.74 | 0.04 |

All units are in g/hp-hr and shown at 100% load (not comparable to EPA weighted cycle values). Emission levels of the engine may vary with ambient temperature, barometric pressure, humidity, fuel type and quality, installation parameters, measuring instrumentation, etc. The data was obtained in compliance with US EPA regulations. The weighted cycle value (not shown) from each engine is guaranteed to be within the US EPA standards.

# Rating definitions and conditions

- Standby ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. No overload capability for this rating. Ratings are in accordance with ISO 8528-1, ISO 3046-1, BS 5514, and AS 2789. Average load factor: ≤ 85%.
- Nominal ratings at standard conditions: 25 °C and 300 meters (77 °F and 1,000 feet).
- Deration Factor:
  - Consult your local *mtu* Distributor for altitude derations.
  - Consult your local *mtu* Distributor for temperature derations.
